

**ANESTHETIC/SURGICAL CONSENT FORM**

Owner: \_\_\_\_\_

Pet: \_\_\_\_\_

As the owner/agent of the animal listed to the left, I hereby give consent to Triangle Animal Clinic to perform the following procedure(s) or operation(s):

- (1) \_\_\_\_\_
- (2) \_\_\_\_\_
- (3) \_\_\_\_\_

I understand that during the performance of the above procedure(s), unforeseen conditions may be revealed that necessitate an extension or variance in the procedure(s) set forth above. I expect Triangle Animal Clinic to use reasonable care and judgment in performing the procedure(s). It is understood that anesthesia, surgery, medical treatment, restrain, hospitalization and sedation involves a small degree of risk of death or injury to my pet which the hospital staff has no control over and cannot be held responsible. The nature of the procedure and risks involved have been explained to me and I realize results cannot be guaranteed. I am also aware that unforeseen events resulting from the procedure(s) will not relieve me from my financial obligation to all reasonable costs incurred regarding this animal.

All animals admitted must be: ***CURRENT ON ALL VACCINATIONS and MUST BE FREE OF EXTERNAL PARASITES. ANY ANIMAL FOUND TO HAVE FLEAS OR TICKS WILL BE TREATED AT THE OWNER'S EXPENSE.*** Treatments include (but are not limited to): \*Capstar    \*Revolution    \*Bravecto

<b>MUST INITIAL YES OR NO FOR EACH QUESTION:</b>		
<b>Yes</b>  <input type="checkbox"/>	<b>No</b>  <input type="checkbox"/>	<p><b>Pre-anesthetic blood screen:</b> Due to pre-existing conditions not evident during routine examinations, we recommend that all surgical patients be screened prior to anesthesia by means of laboratory tests. Doing this we can detect anemia, early kidney damage or liver disease, diabetes or dehydration. Animals at great risk are those 5 - 7 years of age who may have early signs of disease; geriatric animals greater than 8 years old are at high risk of complications associated with anesthesia.    <b>\$83.00</b></p>
<b>Yes</b>  <input type="checkbox"/>	<b>No</b>  <input type="checkbox"/>	<p><b>Surgical Laser:</b> This option replaces the traditional method of using a scalpel to make incisions by precisely controlling a laser beam that instantly vaporizes the water found in tissues, allowing it to cut. The benefits of using the extreme precision laser results in less pain, minimal bleeding, reduced swelling, lowers the risk of infection and results in a quicker recovery.    <b>\$138.00</b></p>
<b>Yes</b>  <input type="checkbox"/>	<b>No</b>  <input type="checkbox"/>	<p><b>Post-op laser treatment:</b> This optional treatment aids in postoperative pain relief and faster surgical site healing using light energy to stimulate inter-cellular activity of the affected tissue.</p> <p><b>Discounted rate is \$21.00 when done in conjunction to surgical procedure, normal laser treatment is \$35.00</b></p>
<b>Yes</b>  <input type="checkbox"/>	<b>No</b>  <input type="checkbox"/>	<p><b>Microchip:</b> If your pet does not already have a <b>microchip</b>, would you like this performed at this time?    <b>\$37.00</b></p>
